## Eriez® Oil Belt Skimmers Now Available with Special Belts for High Temperature Parts Washing Applications

Eriez® Surface Oil Belt Skimmers feature an oleophilic (oil attracting) belt that hangs into the sump where it removes free-floating tramp oils. Two models and four belt options--including a special belt for high temperature parts washing applications--are now available.

The Oil Skimmer squeezes oil between rollers, a method of stripping the oil from the belt that does not require scraping. This skimmer is designed for use on large machine tools with tanks deeper than two feet. The Oil Skimmer Jr. is designed for machine tools with shallow tanks.

Both the Oil Skimmer and Oil Skimmer Jr. models can be equipped with a timer, so the unit runs only when the machine is idle and tramp oils have risen to the surface. "For added convenience, the Oil Skimmer Jr. now comes with a magnetic mount," says Eriez Fluid Recycling Product Manager Ron Wendt.

Eriez has offered the Oil Skimmer and Oil Skimmer Jr. for more than two decades. Wendt reports the company has sold thousands of standard units and tens of thousands of the Jr. design. "Customers keep using them for a very long time and just replace the belts when they wear out," Wendt explains.

For more information about the Oil Skimmer, Oil Skimmer Jr. and additional tramp oil removal solutions from Eriez, visit <http://erieznews.com/nr560>.

*Eriez is recognized as the world authority in separation technologies. The company's magnetic separation, metal detection, material handling, fluid recycling and advanced flotation technologies have application in the mining, processing, packaging, food, recycling, aggregate, plastics and metalworking industries. Eriez designs, manufactures and markets these products through 13 international subsidiaries located on six continents. For more information, visit [www.eriez.com](http://www.eriez.com) or contact Eriez Headquarters, 2200 Asbury Road, Erie, PA 16506 USA at +1 814 835-6000 or [eriez@eriez.com](mailto:eriez@eriez.com).*

**Nexa and Henkel announce expanded collaboration to jointly develop turnkey AM production systems to accelerate adoption in targeted end use markets**

***Opening of full scale additive manufacturing customer center***

Nexa3D, the maker of ultrafast polymer 3D printers, today announced the opening of its first full scale additive manufacturing customer center; NEXTFACTORY in Ventura CA, in partnership with Henkel. Co-located within the Nexa3D global headquarters, NEXTFACTORY provides current and potential customers with direct access to every aspect of the additive polymer manufacturing (AM) process, from design decision support and optimization to full scale additive manufacturing operations including integrated post processing technologies, material formulation customization, colour matching and a variety of finishing options. Both companies plan to invite additional automation, process and software innovation partners to join NEXTFACTORY and be part of delivering complete end-to-end additive manufacturing solutions for volume production applications.

NEXTFACTORY will provide production professionals from around the world with access to the collective domain expertise, resources, tools, optimized functional materials and modular production and post processing equipment of Nexa3D and Henkel to develop their unique end-to-end production workflows. The center will serve as a full capability production scaling facility for customer looking to fasttrack their production scale up process development, material selection and optimization and production line design and procurement.

Nexa3D and Henkel teamed up to meet the accelerated demand for additively manufactured parts and assemblies in several key industries, including mobility, footwear, industrial and health products. Working together, Henkel and Nexa3D plan to deliver the full customer value of additive manufacturing by opening the aperture on functional materials, tailoring material properties, and providing colour matching and finishing options that suit customer specific requirements. At the center, production professionals who are ready to move into large scale digital manufacturing, can access and learn about latest design optimization tools

including part consolidation, light weighting, and access proven methods to scale up to mass production. Customers can also experience a range of manufacturing state-of-the-art software tools including manufacturing execution systems, as well as post processing and finishing automation solutions.

“The Center is designed to help customers across the entire additive process and accelerate the adoption of additive manufacturing in their business, regardless of where they are on their journey,” explained Simon Mawson, Senior Vice President and Global Head of 3D Printing at Henkel. “Customers will benefit from hands-on training and the ability to pilot their own production requirements, enabling them to realize the full potential of additive manufacturing and leverage the combined functional materials, validated work-flows and 3D printing expertise that Henkel and Nexa3D have to offer.”

“For example, customers can come to the center with a prototype product, and we will collaborate with them to design and build a pilot production proof of concept,” said Avi Reichental, co-founder, Chairman and CEO of Nexa3D. “We will then work with them to develop a turnkey solution with the best system, tailored materials and post processing equipment for their application. By working with us, customers will better understand how to industrialize their processes while improving product quality and supply chain sustainability,” concluded Reichental.

As well as supporting customers, Nexa3D and Henkel plan to use the center to accelerate the adoption of additive production at scale for footwear, mobility, industrial and healthcare applications, by demonstrating to businesses how they can create an end-to-end solution using AM technologies.

*About Henkel*

*Henkel operates globally with a well-balanced and diversified portfolio. The company holds leading positions with its three business units in both industrial and consumer businesses thanks to strong brands, innovations, and technologies. Henkel Adhesive Technologies is the global leader in the adhesives market – across all industry segments worldwide. In its Laundry & Home Care and Beauty Care businesses, Henkel holds leading positions in many markets and categories around the world.*

*Founded in 1876, Henkel looks back on more than 140 years of success. In 2019, Henkel reported sales of more than 20 billion euros and adjusted operating profit of more than 3.2 billion euros. Henkel employs more than 52,000 people globally – a passionate and highly diverse team, united by a strong company culture, a common purpose to create sustainable value and shared values. As a recognized leader in sustainability, Henkel holds top positions in many international indices and rankings. Henkel's preferred shares are listed in the German stock index DAX. For more information, please visit [www.henkel.com](http://www.henkel.com).*

*About Nexa3D*

*Nexa3D is passionate about digitizing supply chain sustainably. The company makes ultrafast polymer 3D printers, that deliver 20X productivity advantage, affordable for professionals and businesses of all sizes. The company partners with world-class material suppliers to unlock the full potential of additively manufactured polymers for volume production. The company makes automated software tools that optimize the entire production cycle using process interplay algorithms that ensure part performance and production consistency, while reducing waste, energy, and carbon footprints. For more information, please visit [www.nexa3d.com](http://www.nexa3d.com).*

# DIAGNOSE YOUR OWN EQUIPMENT.

**OHV Pro**

Vehicle Diagnosis

Big updates on  
**CASE, New Holland, JCB  
& John Deere**

The **OHV Pro** is our answer to folks needing a stand alone, full featured scan tool for working on Agricultural, Construction, Mining and other Off-highway applications. Brands such as John Deere, Volvo, Caterpillar and CASE are covered. Perform bi-directional controls on hydraulics and special functions, such as injector coding, DPF regens and VGT calibrations.

8" Android Tablet | IP65 Rated | Bluetooth® Wireless | Easy Updates | Remote Technician
